MEDICAL INCREDIBLE

Explore the extremes of the amazing human body

MEDICAL INCREDIBLE

The most incredible species on the planet is human.

Medical Incredible explores the extremes of the human body; new and unusual breakthroughs in medical technology; and stories of survival that are simply astonishing. We'll meet some of the rarest members of the human race, people who have overcome impossible odds to endure the most extreme and unusual medical conditions known.

Meet the family who have inherited the cruel genetic mutation of Lobster Claw Syndrome and the incredible Shappell sisters who are joined at the head. Listen to the astonishing story of the ectopic triplet (conceived and grown outside the womb) that has doctors and ethicists debating whether a man could have a baby. We'll introduce you to the original Rainman, Kim Peek, who continues to astound doctors with his unquenchable thirst for knowledge. He has the IQ of 72 with the genius of Mozart. Watch as the world's worst stutterer is instantly cured by a tiny device he fits into his ear.

Medicine really is incredible.
