

YOU should **REALLY** see a DOCTOR

BEYOND

**WILL OUR DOCTORS AGREE WITH
THEIR PATIENTS' OWN DIAGNOSES?**

IN THIS INTRIGUING NEW SERIES, PATIENTS PRESENT THEIR OWN CASES TO THE SHOW'S RESIDENT DOCTORS.

The patients also present their own research and theories to the doctors. How wrong or how right do they get it? We follow those who require further exploration on their journey as they go from our location diagnosis to solving their health issues.

The self-diagnoses are vast and varied. From sleep apnoea to food intolerances, and irritable bowel syndrome to the fabled underactive thyroid. But are our patients' symptoms real or the result of too much online research?

Led by Dr Pixie McKenna (*Embarrassing Bodies, C4*) and Dr Phil Kieran, our doctors debunk health fads, explore the latest medical breakthroughs and demonstrate proven medical facts.
