# INSIDE HITLER'S BUNKER

## THE LAST ARCHIVES

### Discover what really happened inside Hitler's secret bunker

On the 30th April 1945, inside Hitler's bunker, as the Soviet army advance, the deluded and increasingly paranoid Adolf Hitler commits suicide. On the very same day, the Soviets hoist their red flag on top of the Reichstag and a week later, the Armistice is signed. World War II is officially over.

Almost 75 years later, new evidence has emerged which reveals what really happened inside the bunker during the last hours of the Third Reich. Through dramatic historical re-enactments, this fascinating documentary follows the tracks of five soldiers who were able to enter the bunker just after the war had ended and reveals the secret documents that were found.

Accompanied by in-depth analysis by experts and historians of the Third Reich, viewers will discover more about the last days of one of the worst dictators ever, and the end of World War II.
