

CORVETTE

REBUILDING AN ICON

The Corvette is at the crossroads.

For more than 50 years America's most popular sports car has been a motoring icon – a car that brings with it not just four wheels and a V8 engine, but a lifestyle too. To date there have been just five generations of the car made and each has come to be regarded as a classic of its time. Now C6 will be produced, a new version with classic style but significant changes. These changes need to be kept under wraps.

The auto magazines are desperate for news. It's rumoured they're offering US\$50,000 for the first photo of a C6.

A huge challenge lies ahead. Team Corvette has to perfect the car in real world conditions, within six months, and everything must be done with high secrecy.

With the launch only a short time away, and half a century of Corvette heritage on the line, will this new sports car be ready, and will the world like what it sees?
