**SERIES INFORMATION**  
Paramount+ • Drama • 60 Mins  
Season 1 (6 eps)  
Premiere Date: January 12, 2023

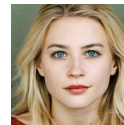

*The Chemistry of Death* is a thrilling psychological crime series based on the critically-acclaimed book of the same name by Simon Beckett

After a devastating personal tragedy, forensic anthropologist Dr. David Hunter turned his back on his past as a police consultant and started a new life as a country doctor. He hoped his past would stay buried but when the bizarrely mutilated body of a young woman is found in the woods, he's asked to help the police find the killer. Initially David is reluctant to step back into that world but then another woman disappears and everyone in the small community finds themselves under suspicion. As the community begins to tear itself apart, David knows he'll have to call upon all his knowledge to find the twisted mind behind the killings.
