Seasons 1-9 (197 eps total)  
2004-2013

**A speck of blood. An invisible fingerprint. A single strand of hair.**  
**Thanks to DNA evidence, even dead men can tell tales**

CSI: NY is a crime drama series about forensic investigators who use high-tech science to follow the evidence and to solve crimes in New York City. Detective Mac Taylor, a dedicated and driven crime scene investigator who believes that everything is connected, and everyone has a story, is a decorated Marine who served in Desert Storm and dabbled in war photography. The job is his life; he focuses on cases until they are solved. His team of New York CSIs may have a different process from those in Las Vegas, but they are guided by the same steadfast determination. These skilled investigators follow the evidence as they piece together clues and eliminate doubt to ultimately crack their cases.
